SUMMARY

A dedicated and resilient final-year Bachelor of Science in Information Technology student offering a versatile skill set that bridges technical capability with exceptional interpersonal skills. Driven by a strong foundation in computer science and a passion for logical problem-solving, I am highly motivated to delve deeper into software development and software testing methodologies. Known for accountability, clear communication, and the stamina to handle demanding, high-volume operational environments. Adaptable and eager to leverage this technical drive to add immediate value across software quality assurance, development, or operational support roles, as well as within fast-paced retail and customer service environments.

EXPERIENCE

03/2026 to Current	Student Assistant (CMPG 213)
	North-West University
	- Invigilation of formal class test and graded academic scripts under tight deadlines, ensuring fairness and accuracy in assessment. - Facilitated practical learning support sessions for students. - Translated complex technical guidelines into simple instructions for peers, improving communication and understanding across the team.

SKILLS

- Point of Sale (POS) system - Microsoft Office Suite - SQL - Data Management - Basic Programming - C# - C++ - Python	- Customer Service - Team Collaboration - Time Management - Adaptability - High Pressure Operations - Certified First Aider - Basic Fire Fighter - Workplace software
---	---

EDUCATION

12/2026	Bachelor of Science: Information Technology
	North-West University (NWU) – Vanderbijlpark
	In progress
12/2021	National Senior Certificate
	Letsatsing Science Secondary School – Mahikeng

TRAINING & CERTIFICATION

- First Aid Training (Level 1), Emfuleni Fire Fighting Department, 2025
- Basic Fire Fighting, Emfuleni Fire Fighting Department, 2025

TECHNICAL PROJECTS (ACADEMIC)

- Computer Networks Project (Cisco Packet Tracer), 2026: Designed and simulated a secure multi-floor campus network. Configured VLAN trunking, subnets, and DHCP pools across departments, and successfully troubleshooted routing issues to ensure 100% virtual uptime.
- Business Intelligence (BI) Pipeline Project, Academic Software Development Project, 2025. Designed a scalable data migration layout, moving historical database records into optimized modern formats. Programmed clean data cleaning scripts using Python to streamline heavy data processes smoothly.
- Clinical Decision Support System (CDSS), Collaborative Group Project, 2024. Partnered closely within a development team to build a web-based healthcare application interface using C# (ASP.NET). Focused heavily on user interface navigation paths to ensure medical staff could log and access patient records effortlessly.

LANGUAGES

- **English:** Advanced / Professional Proficiency
- **Setswana:** Native
- **isiZulu:** Intermediate

HOBBIES AND INTERESTS

- Game jams and Hackathons
- Tech Exploration
